

APEX 360 CLEANING ACCESSORIES

APEX FLEXO BRUSHES

Manual cleaning brushes designed for safe and effective cleaning of anilox rolls and printing plates in flexographic applications.

KEY BENEFITS

- Surface-specific cleaning performance
- Reduces risk of anilox and plate damage
- High durability filaments
- Chemical-resistant construction
- Designed for controlled manual cleaning

APPLICATIONS

- Cleaning of anilox rolls
- Cleaning of printing plates
- Removal of ink residues
- Flexographic printing units
- Maintenance cleaning of equipment

USAGE STEPS

1. Select correct brush type
2. Apply appropriate cleaning solution
3. Brush surface using light pressure
4. Work in consistent motion

5. Repeat if necessary
6. Rinse with water
7. Dry surface

TECHNICAL PROPERTIES

Property	Value
Filament Diameter	0.10 mm
Filament Type	Straight, uniform
Handle Material	Chemical-resistant PVC
Chemical Resistance	High
Brush Types	Steel, Bronze, Nylon
Application Method	Manual

BRUSH TYPES

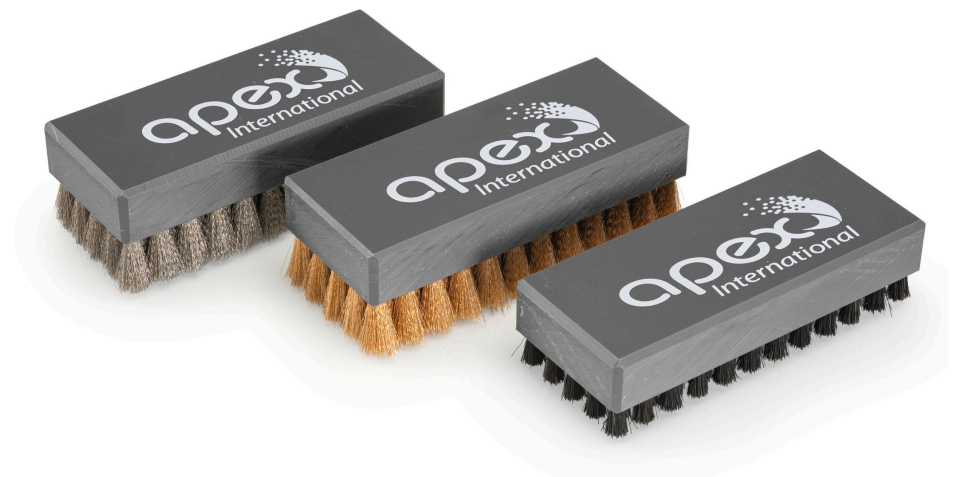

Type	Material	Application
Type S	Stainless Steel (V2A)	Ceramic anilox rolls
Type B	Phosphor Bronze	Chrome anilox rolls
Type N	Nylon	Printing plates

HEALTH & SAFETY

Use appropriate personal protective equipment when handling cleaning chemicals in combination with brushes. Avoid excessive pressure to prevent surface damage.

STORAGE

Store in a clean, dry environment.
Avoid deformation of filaments.

BUILT BY EXPERTS. CLEANED BY EXPERTS.
